

Rooms you feel right at home in

Whether at home, at work or overseas – people spend the greatest part of their lives in buildings. There are rooms in which you feel fine, and rooms in which you do not. What can one do in order to improve the well-being of people in buildings? The technology from Kieback&Peter provides solutions where life becomes more pleasant and more comfortable.

Kieback&Peter – an enterprise with tradition and commitment

Kieback&Peter is one of the leading manufacturers and providers of high-quality and innovative control engineering for HVAC applications together with computer-assisted building automation.

The success of the family-run enterprise is based on more than 80 years of experience. This is demonstrated by the knowledge and the commitment of all the employees across Europe.

Kieback&Peter is your partner for innovative solutions, for good and fair consultation, for fast supply and

installation as well as reliable service in connection with building automation.

Our research and development department cooperates closely with all subsidiaries. Therefore our products correspond to the needs and requirements of the application and of our customers.

Kieback&Peter solutions are used in office buildings, in industry and production plants, in hotels, hospitals, schools and universities, administrative buildings, banks and shopping centers,

right up to local heating supply networks and solar electricity plants. Everywhere they increase and protect asset value.

No matter where we work:
Our task consists of optimally fulfilling requirements. We offer you long-lived, investment-safe, high performance and reliable solutions.

With Kieback&Peter technology you increase your effectiveness and profitability, improve working reliability and increase comfort at the same time.

Kieback&Peter in brief

- 80 years of experience
- More than 800 employees
- Two DIN EN ISO 9001 certified production facilities in Berlin-Mittenwalde and Trier
- A high-performance development center
- 32 subsidiaries in Germany
- An extensive network of addresses in Europe and agencies world-wide

“With our products and services for building automation, we are constantly challenging ourselves to offer the best solutions, both for the operators of equipment and also for the users of buildings.”

Kieback&Peter competence

Our theme is intelligent building automation.
Our solutions and products fulfil the highest requirements.

- The building user is more than satisfied with the great room climate and comfort due to our building automation, which are important conditions for satisfaction and productivity.
- Investors and operators profit from the reliability, flexibility, efficiency and investment security of our systems.

We offer local consultation and services via an extensive network of partners. From the first consultation over the project right up to start-up, a competent team of sales employees, technicians and engineers are always at your disposal.

After start-up, our customer service provides reliable maintenance, working reliability and technical support. Careful training for the correct handling of our systems comes naturally to us.

Our production in Mittenwalde and Trier work with the latest production technologies according to the strictest quality standards on the basis of DIN EN ISO 9001. We therefore ensure the best product quality at all times.

Our rich experience in the market and the customer's needs are the basis for new innovative ideas for the advancement of our systems, devices and services. These are realized into maximum technological performance by our development department with their comprehensive know-how.

Kieback&Peter – Professionals by your side

Kieback&Peter Know-how

Kieback&Peter stands for intelligent products and systems, for effective and reliable control, regulation, monitoring and operation of technical building equipment. Our solutions are exactly coordinated with the needs of our customers and local requirements. They deliver high quality, reliability and extreme ease of use. Cutting-edge products in the service of humanity; that is our philosophy.

Our product portfolio includes:

- The DDC4000 automation system with the greatest ease of use for secure and fast equipment operation, native BACnet®, integrated web solutions, and parameterizable objects for nearly boundless application possibilities.
- The solar radio-based technoLink® system for all areas within which "custom-made" automation solutions without wiring and interference are demanded within the building.
- The technolon® concept for effective, energy saving room automation with LonWorks®, with high transparency at all levels.
- The BMR Automation Station for heating and ventilation is simple to use, comes with native BACnet® and Internet access and is configurable for all requirements.
- The new generation of intelligent control drives for exact control, reliability and flexibility.

Our different product families mutually complement each other. Old and new systems are compatible up to the third generation. Our products "speak" standard protocols such as BACnet, LonWorks, EIB or Modbus. Open interfaces also make possible the integration of products and systems from other manufacturers.

Our products excel at all levels – from room level to management level.

Kieback&Peter products and systems comprehensively cover the requirements of the regulation, control, monitoring, operation and optimization of equipment.

We offer:

- Sensors and actuators
- Automatic controllers and controls
- Monitoring software
- Peripheral devices and accessories

Our customer relationships are characterized by the principle of the reliable partnership.

Our technology is characterized by openness, flexibility, adaptability and extreme ease of use. Our products are defined by reliability, robustness and high quality. Their value for the user lies in the effective and secure equipment control with energy conservation and the improvement of room comfort for the building users. Investments with Kieback&Peter are safe investments, since old and new systems and products are compatible with one another.

“Made in Germany” is a brand description for quality and reliability. Our two manufacturing plants in Germany work at the highest technical level with the latest production technologies. The production processes are organized in such a way that all delivery needs can be fulfilled fast and always on time.

The DIN EN ISO 9001 certified Mittenwalde production facility

“For our customers we combine our technical know-how with wide-ranging authority.”

Kieback&Peter combines comfort and efficiency

Imagine a working environment in which you feel fine because the temperature, air humidity and lighting are exactly adapted to your needs. Imagine that the technology, which provides for this comfort, also lowers energy consumption at the same time and only uses up as many resources as are absolutely necessary. This is not a vision, but a daily reality in buildings which are equipped with Kieback&Peter technology.
